WORK EXPERIENCE

SOFTWARE ENGINEER – IT22 B.V – 1 Jan 2023 – Current – ISLAMABAD, PAKISTAN

Department: Development | **Email:** feroz.shah@it22.nl | **Website:** <https://it22.nl/>

- **Led the backend team** in developing and maintaining **scalable microservices** using **Quarkus, MongoDB, Apache Camel, and Kafka** for enterprise applications.
- **Designed and implemented a dynamic Role-Based Access Control (RBAC) system** using **Keycloak**, enabling fine-grained permission management across different modules.
- **Built and optimized MongoDB aggregation pipelines**, significantly improving data retrieval efficiency and system performance.
- **Integrated Apache Camel and Kafka** for **seamless data processing, automation, and event-driven communication** between microservices.
- **Developed real-time notification, relay-service and email services**, enhancing cross-platform communication and user engagement.
- **Collaborated with cross-functional teams** to optimize **ERP and PMS systems**, ensuring high scalability, maintainability, and efficient workflows.
- **Deployed a Red Hat OpenShift cluster** via Assisted Installer from console.redhat.com, deploying 3 control plane and 1 worker nodes on KVM on premises.
- **Deployed OKD** on KVM on premises with 3 control nodes and 1 worker node.
- **Designed and implemented Tekton CI/CD pipelines** resolving critical build infrastructure issues (too many open files errors) by optimizing Maven containerized builds with single-threaded compilation and JVM memory isolation, ensuring consistent deployments across multiple Java versions.
- **Maintained Argo CD applications** (App-of-Apps and per-service apps), wiring them to Git repositories and Helm charts to enable fully GitOps driven deployments on OpenShift.
- **Integrated Git webhooks with OpenShift Pipelines and Argo CD**, enabling automatic pipeline runs and application syncs on code changes.
- **Helm** Configured Helm values and environment specific service configurations for multiple microservices.
- **Container & Cluster Security Monitoring:** Deployed and configured **Wazuh** on **OpenShift** and **OKD** clusters for centralized security monitoring, log analysis, and threat detection across containerized environments.
- **CI/CD Pipeline Security Integration:** Integrated **Trivy** image vulnerability scanner into CI/CD pipelines to automate container image scanning, enforcing shift-left security and detecting CVEs prior to deployment.

SOFTWARE ENGINEER – ESOLS TECHNOLOGIES – 1 Aug 2021 – 1 Jan 2023 – ISLAMABAD, PAKISTAN

Website: <https://esols.tech>

- Developed and maintained backend services for **6+** projects, leveraging **Node.js, Express.js, MongoDB, Socket.IO, AWS S3, and AWS Lightsail**.
- Contributed to the development of multiple applications, including **EGASI, Khebra, SmartBookings, Waves, and Brainbook**, enhancing functionality and improving performance by **35%**.
- Integrated **AWS S3** for file storage and retrieval, improving application reliability.

SKILLS

Java | Quarkus | Good knowledge of Kubernetes | Python | Tekton CICD | GitOPS: ArgoCD | Javascript | Docker | NodeJS | ExpressJS | SQL | MYSQL | MongoDB | Git | GitHub | Postman | Firecamp | AWS (EC2, S3, Lightsail) | Keycloak (IDM) | Version Control Systems (Git, Bitbucket) | Kong Gateway | Security & DevSecOps: Wazuh, Trivy, Container Security, Vulnerability Scanning | Container Orchestration: OpenShift, OKD

EDUCATION AND TRAINING

20 MAR 2017 – 3 OCT 2019 Islamabad, Pakistan

M.SC INFORMATION TECHNOLOGY – 16YR EDUCATION Quaid-e-Azam University

Address Quaid-i-Azam University Islamabad, Pakistan, 45320, Islamabad, Pakistan | **Website** <https://qau.edu.pk/>

● **LANGUAGE SKILLS**

Mother tongue(s): **KALAS'A MON'DR**

Other language(s): **ENGLISH**

● **MANAGEMENT AND LEADERSHIP SKILLS**

President of IIT-Society Quaid-i-Azam University, Islamabad

As the president of the IIT Society at Quaid-i-Azam University, Islamabad, I successfully led the organization of various initiatives, including trips, events, and extracurricular activities. My role involved coordinating with team members, managing logistics, and ensuring that each event was both engaging and enriching for participants, thereby enhancing the student experience and fostering a vibrant community.
